

DVD ORDER FORM

Thank you for your interest in our ACL Prevention Program. As you are aware, the Santa Monica Orthopaedic and Sports Medicine Research Foundation is a non-profit research center that focuses on providing medical service and performing basic clinical research to improve the quality of life of the community at large, including the underprivileged neighborhoods of the greater Los Angeles area. We strive to provide educational awareness to help prevent significant injuries from occurring.

Due to the rising costs of video duplication, mailing materials, and postage; the cost of the program is \$25 per video/DVD. Please make a check payable to the Santa Monica Orthopaedic and Sports Medicine Research Foundation (SMOSMRF). If you would like to contribute any additional funds to assist us in our research efforts, we would be most appreciative. That portion of your check will be tax deductible. Your contribution will assist us in continuing our research efforts which currently include articular cartilage research, improvements to ACL reconstructive surgery, head injury and concussion prevention, and an ACL prevention project for Basketball athletes.

If you have any questions or concerns, please feel free to contact me immediately. On behalf of the entire Foundation, we thank you immensely for your generosity.

Most sincerely,

Holly J. Silvers, MPT
Director of Research/Physical Therapist
